The power of God's love is the greatest agent for bringing needed change and healing into the world.

"We all have a natural desire to improve ourselves and the world around us. In my own life, I've found that letting God, divine Love, guide and direct my efforts brings permanent and meaningful results." Mark McCurties

McCurties has had a life-long love of the Bible and its inspiring message of individual triumph over adversity. After graduating from college he spent a number of years in the field of education where he worked as a camp director, experiential educator, resident counselor, and athletics coach. While working with young people, he had many opportunities to witness the healing power of God, and these inspiring experiences eventually led him into the full-time public practice of Christian Science.

Mark McCurties is a practitioner of Christian Science healing and a member of the Christian Science Board of Lectureship.
